SUMMARY

Full Stack Web Developer with 3+ years of experience building and scaling Pay-In and Pay-Out systems in fast-paced startup environments. A founding team member across multiple ventures, I specialize in payment gateway aggregators, API integrations, CRM systems, and reconciliation platforms. Adept at both frontend and backend technologies with exposure to cloud infrastructure, I aim to contribute to robust system architecture and scalable product development.

WORK EXPERIENCE

Full Stack Web Engineer | Frenzopay

(Apr '23 - Present)

- **Pay-In & Pay-Out Systems:** Developed scalable modules required in Pay-Out and Pay-In supporting high-volume financial transactions.
- **CRM Development:** Designed and implemented CRM systems with comprehensive roles and permissions, serving both internal teams and external merchants for streamlined client management and optimized payment workflows.
- **White Label Management:** Created and managed customizable white-label solutions for various clients, ensuring seamless integration and consistent performance.
- **Frenzo Verify (KYC/KYB):** Engineered and launched Frenzo Verify from scratch, offering robust KYC and KYB services with dedicated CRM functionality and integration capabilities.
- **Bank API Integrations:** Built secure and reliable bank integrations enhancing transaction accuracy and system reliability.
- **Team Leadership:** Mentored junior developers, facilitated agile ceremonies, and directed strategic technical architecture decisions.
- **Security & Compliance:** Conducted AVS security scans and ensured compliance with PCI DSS standards for secure transaction processing.

Full Stack Developer | Cashlesso

(Jan '22 - Mar '23)

- **Integration Kits Development:** Designed reusable merchant integration kits using MERN and MEAN stacks, significantly reducing setup time for new partners.
- **Automated Reconciliation Engine:** Developed a full-stack reconciliation application using React and Node.js to automate bank statement parsing and error detection, streamlining financial reporting.
- **Cross-Functional Collaboration:** Worked closely with designers, product managers, and QA to deliver robust and user-friendly features in agile sprints.

Full Stack Developer Intern | CODfirm

(Aug '21 - Dec '21)

- **Third-Party Payment Integration:** Integrated Paytm's Payment Gateway using Node.js, enabling secure online transactions across the platform.
- **REST API Development:** Created scalable RESTful endpoints with Express.js to support key business functionalities in the backend.
- **Frontend Implementation:** Designed interactive UI components using React, Polaris, and Ant Design to enhance the application's user experience.

CORE COMPETENCIES

- **Frontend Technologies & Frameworks:** React.js, JavaScript, HTML5, CSS3, SASS, Bootstrap 5, Flexbox, Ant Design, MUI
- **Backend & Database:** Node.js, Express.js, Python, Django, MongoDB, PostgreSQL, EJS
- **DevOps & Tools:** AWS (EC2, S3), Git, GitHub, Bitbucket, Postman, Nginx, Pm2
- **Other Skills:** UI Design and Architecture, API Integrations,, Reconciliation Systems, PCI DSS Compliance, Agile & Scalable Development

PROJECTS

- **Campsite - [GitHub link](#)**
Built a full-stack web app to post and explore camping sites. Features: authentication, REST APIs, Mapbox integration, and MVC.
- **TV Series Search (ITDB) - [GitHub](#)**
Created a responsive UI for searching series using TV Maze API with Axios, Bootstrap, DOM manipulation, and SASS.
- **Portfolio Website - [GitHub](#)**
Personal portfolio featuring tools & resources using Bootstrap 5.0.
